## Genetic Support Network of Victoria

## Information

Whether you prefer to talk to someone on the phone, check out the web site or read one of our latest publications, we can offer you the information you need, giving you the correct information on time, in time, from the right people.

Ask us about...

- contact details for support groups
- community resources
- genetic conditions
- genetic hot topics
- information and resources for support groups
- setting up a support group
- and much more!

The GSNV can link up existing support groups to facilitate in the exchange of information and ideas, and can even link you up with other families who share your condition.

## Advocacy

The GSNV aims to provide a strong voice for people affected by genetic conditions. This is achieved through representing and promoting members' rights to the wider community and State and Federal Governments and providing a link between members and health service providers.

## Support

We provide a friendly, caring, accessible and informed point of contact for individuals and families affected by genetic conditions. The GSNV aims to provide people with appropriate and timely support and assistance to support-groups. We are proud to assist in the development of new support groups and can assist with information on administration, finances and incorporation.

## Education

GSNV aims to support its members by offering educational experiences such as workshops and seminars to help them expand their knowledge and skills – from workshops on grant applications to seminars on specific conditions or medical interventions. The GSNV also provides the opportunity for members to participate in events to educate the wider community on issues concerning genetic challenges.

Ask us about...

- upcoming seminars
- Genetic Support Awareness Week
